

betaNB: Bootstrap for Regression Effect Sizes

Ivan Jacob Agaloos Pesigan

Description

Generates nonparametric bootstrap confidence intervals (Efron & Tibshirani, 1993) for standardized regression coefficients (beta) and other effect sizes, including multiple correlation, semipartial correlations, improvement in R-squared, squared partial correlations, and differences in standardized regression coefficients, for models fitted by `lm()`.

Installation

You can install the released version of `betaNB` from [GitHub](#) with:

```
install.packages("remotes")
remotes::install_github("jeksterslab/betaNB")
```

More Information

See [GitHub Pages](#) for package documentation.
